CSCI 2270

Data Structures & Algorithms

Gabe Johnson

Lecture 22   March 8, 2013

Huffman Codes

Upcoming Homework Assignment

Priority Queue

PQs due this evening. It is up on RG. **There is no C++ driver in the homework directory, but the Java and Python ones do the same thing.** So you may study them and re-implement in C++. I'm not doing anything overly evil or tricky: just adding some stuff, peeking, and removing. I'm not trying to remove from an empty list, or add several items with the same priority.

Huffman Encoding

The entire lecture is in **HuffmanEncoding.pdf**, which is found on GitHub in the HW 7 directory.
