Exam 2

Tests won't be graded until the end of Break.

Sorry, we couldn't get a quorum with the graders.

FRIDAY: Elective class. I'll talk about HCI (Human-Computer Interaction) and research. Skip if you want.

1. All the complexity questions are asking about *average complexity.*

2. The Priority Queue question uses 'remove' instead of 'pop'. These mean the same thing.

3. For the huffman tree diagram question, just draw the *final state* of the tree.
